

Benefits to owning a PFWCES's 4Ever Homes

Focal point in savings... no gas or hydro bill!

1. **Cost Savings:** 4Ever Homes are designed with cost-effectiveness in mind. The integrated agriculture systems allow homeowners to grow their own food, reducing grocery bills and providing a steady supply of fresh produce. Additionally, the hybrid sustainable design incorporates energy-efficient technologies, leading to lower utility bills over time.
2. **Energy Efficiency:** These homes are built with cutting-edge energy-efficient features such as solar panels, energy-efficient appliances, and smart home technologies. This reduces reliance on non-renewable energy sources, lowering energy bills and carbon footprint.
3. **Food Security:** The integrated agriculture systems within the homes contribute to food security. Homeowners can grow fruits, vegetables, and herbs right at home, ensuring a consistent and healthy food source, regardless of external factors.
4. **Environmental Sustainability:** 4Ever Homes are a testament to sustainable living. The use of renewable energy sources and reduced energy consumption helps mitigate environmental impact. The integrated agriculture systems promote local food production, reducing the carbon footprint associated with transportation and conventional agriculture.
5. **Improved Air and Water Quality:** These homes often incorporate features like rainwater harvesting and air purification systems, leading to improved indoor air quality and reduced strain on local water resources.
6. **Resilience and Self-Sufficiency:** The integrated agriculture systems contribute to a more self-sufficient lifestyle. Homeowners become less dependent on external food sources and energy providers, enhancing their resilience to external disruptions.
7. **Health and Well-being:** Living in a home surrounded by greenery and growing your own food can have positive effects on mental and physical health. The reduced exposure to pesticides and other chemicals associated with conventional agriculture is an added health benefit.
8. **Community Engagement:** Power From Within Clean Energy Society's focus on community extends to the 4Ever Homes concept. The no food waste program, Seed2Table, and the overall sense of community within a gated community without fences foster a strong sense of belonging and collaboration.
9. **Long-Term Investment:** 4Ever Homes are not only affordable upfront but also offer long-term financial benefits. The energy efficiency, reduced utility bills, and potential for increased property value due to sustainable features make them a sound investment.
10. **Educational Opportunities:** Living in a 4Ever Home provides valuable learning experiences for homeowners and their families. The integrated agriculture systems offer opportunities to learn about sustainable farming practices, while the energy-efficient technologies encourage an understanding of clean energy.
11. **Contributing to Solutions:** By owning a 4Ever Home, homeowners become part of a movement that addresses the housing crisis and contributes to environmental solutions. They play an active role in demonstrating the viability of sustainable living and inspiring others to follow suit.

Owning a Power From Within Clean Energy Society's 4Ever Home goes beyond a typical homeownership experience. It embodies a commitment to a more sustainable, community-focused, and resilient way of life—one that not only benefits the homeowners themselves but also contributes positively to the broader world.
