

PFWCES 4 Issues we have solutions for families and communities

The Power From Within Clean Energy Society (PFWCES) stands as a remarkable testament to collaborative, forward-thinking volunteers united by a common vision. Diverse in origins and generations, our team has come together to address four major issues impacting families today, and through innovative solutions, we are transforming lives.

1. Home Shortages: In many parts of the world, there is a critical shortage of affordable housing. Families struggle to find suitable living spaces, leading to overcrowding and instability. PFWCES recognized this issue and decided to act. We've designed the 4Ever Homes to not only provide comfortable living spaces but also to set a new standard for speed and efficiency in home construction. Our homes are the answer to this crisis, offering a sustainable solution for families in need.

2. Affordability: The soaring costs of housing are a major concern for families worldwide. PFWCES understands the importance of affordable homes. Our 4Ever Homes are not just sustainable but also cost-effective. They save families over \$5000 annually, offering financial relief and a chance at homeownership that may have seemed out of reach before.

3. Fresh Agriculture: As urbanization advances, the connection between people and their food sources dwindles. PFWCES believes in reestablishing this connection. Our integrated agriculture rooms provide families with the opportunity to grow their own fresh produce, fostering self-sufficiency and healthier eating habits. We are putting the "farm" back into the family.

4. Clean Energy Resources: The world is at a crossroads when it comes to energy. PFWCES recognizes the importance of clean energy for the planet's future. Our homes incorporate clean energy technologies, reducing our reliance on non-renewable resources. By embracing these technologies, we're helping families save on energy costs while reducing their carbon footprint.

Years of dedicated research and networking have led us to the creation of the 4Ever Homes. These hybrid sustainable homes are the embodiment of our commitment to addressing these issues and providing tangible solutions. They offer a way for families to live sustainably and comfortably, with significant annual savings.

But our mission goes beyond the homes themselves. We've designed a no food waste program, optional for residents, which not only reduces waste but also strengthens our sense of community. Our community barter program encourages the exchange of skills and resources, fostering collaboration and mutual support. Through community employment opportunities, we're creating avenues for individuals to contribute meaningfully to our collective vision.

From Seed2Table, the journey of a PFWCES 4Ever Home within our gated community without fences is truly life changing. It's a step towards a healthier, more cost-effective, and sustainable way of living that empowers families and communities alike.

Join us in this transformative journey toward a brighter, greener, and more inclusive future. Together, we can make a profound difference in the lives of families and the well-being of our planet.

Sincerely,

Isaac Evans-Gould
